Monthly Jobs Report

Revised June and July Preliminary Jobs Figures Released

INDIANAPOLIS (August 15, 2006) – The number of jobs in Indiana has risen for six consecutive months and is now 24,300 higher than this time last year, according to figures released today by the Indiana Department of Workforce Development.

Indiana's seasonally adjusted job figures indicate a revised June total of 2,976,600 jobs while preliminary figures for July indicate 2,976,800 jobs. The July seasonally-adjusted employment total represents an increase of 200 jobs from June.

The payroll employment statistics used in the jobs report is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.

Seasonally Adjusted Figures

The nation's seasonally adjusted figures for July show that U.S. employment rose slightly with the service industries providing the impetus. Construction employment saw little change and manufacturing reduced payrolls with widespread losses throughout the industry. Over the year, payrolls are higher by 1.7 million jobs with construction, professional & business services, education & health services and leisure & hospitality contributing the most.

Meanwhile, Indiana remains approximately 37,100 jobs off its peak, which was reached in May of 2000. The number of jobs in Indiana according to June revised data was 2,976,600, whereas July preliminary figures were 2,976,800. Indiana payroll employment made a small gain of 200 jobs over the month.

Among the eleven supersectors, three gained, four lost and four remained unchanged. The trade, transportation & utility and education & health services sectors each gained 1500 jobs to lead the way. Manufacturing, with a loss of 500 jobs, declined the most. Over the year employment is higher by 24,300 with all supersectors posting at least modest gains.

Non-Seasonally Adjusted Figures

Indiana's July preliminary non-seasonally adjusted payroll estimates indicate 2,943,900 jobs for the state, while June's revised total reported 2,978,800 jobs. Employment is lower by 34,900 when compared to one year ago. Job losses have averaged 42,200 in July over the past ten years with most major components seeing losses that were somewhat less than normal this year. Most major components saw decreases that were somewhat less than recent trends. Manufacturing's less-than-normal decline is due to fewer factory re-tooling shutdowns. Trade lost fewer seasonal jobs because seasonal hiring had been lighter than normal this year.

Non-Seasonally Adjusted Metropolitan Statistical Areas

Preliminary job figures in the state's Metropolitan Statistical Areas (MSA) for June, with last month's and last year's job numbers:

MSA	July 06	June 06	July 05
Anderson	42,700	45,200	42,800
Bloomington	78,100	78,800	77,800
Columbus	43,300	43,500	42,900
Elkhart-Goshen	131,200	131,800	128,300
Evansville	180,100	181,100	177,400
Fort Wayne	215,100	217,000	212,600
Gary	277,200	281,700	274,700
Indianapolis	884,200	894,400	888,100
Kokomo	46,700	46,900	47,500
Lafayette	89,400	90,100	87,600
Michigan City	47,400	48,200	46,800
Muncie	49,300	50,600	49,300
South Bend	146,000	147,600	143,400
Terre Haute	72,900	73,600	72,100

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For the most accurate analysis, please use revised data sets and not preliminary estimates.

-30-

Note to media: There have been inquiries regarding the difference between jobs and employment releases provided by the Department of Workforce Development. The following definitions outline the differences between these two statistical measurements.

Jobs (release date: August 15, 2006)

Job statistics are provided by the U.S. Bureau of Labor Statistics, derived from a survey of payroll records. As a payroll survey, it is based on an individual's place of work and includes industrial classifications. It includes non-farm wage and salary reports, but does not include self-employed, business owners and farm workers.

Employment (release date: July 26, 2006)

Employment statistics are provided by the U.S. Bureau of Labor Statistics, derived from a household survey. As a household survey, it distinguishes whether an individual (counted once) is employed or unemployed, even if that individual has more than one job. The unemployment rate is calculated from these same statistics.
